

# TRIACARP MANU

Fixed wrist hand brace / support splint

SRT 211

## Indications

Used for sprains, dislocations, osteoarthritis, carpal tunnel syndrome, radial nerve paralysis, tenosynovitis, fractures of the wrist or distal ulna/ radius.

## Description

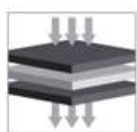

The brace is made of textile and is comprised of:

- malleable palmer stay
- additional strap around the radiocarpal joint for increased support

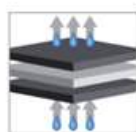

Hook and loop fastener on the dorsal side of the hand. Length: 24 cm. The orthosis stabilises and immobilises the radiocarpal joint.

## Composition

The three-layer laminated textile behaves like a moisture regulator, wicking moisture in an outward direction.

Air Transfer

Water Transfer
